La Grange Hydroelectric Project Final License Application – Filing of Supplemental
Information

Dear Secretary Bose:

On October 11, 2017, Turlock Irrigation District and Modesto Irrigation District (collectively, the Districts) filed with the Federal Energy Regulatory Commission (FERC) a Final License Application for the La Grange Hydroelectric Project, FERC No. 14581. On November 27, 2017, the Districts filed additional information in response to FERC's Additional Information Request issued on October 27, 2017.

This information is provided to supplement Exhibit A - Project Description to clarify the capacity rate (dollars per kilowatt-year) to be used to value project capacity for the electric market:

Turlock Irrigation District (TID) provides retail electric service to over 90,000 customers. The energy output of the 4.7 MW La Grange Project is used directly by TID as part of its supply to meet electric customer demand. The capacity market is presently not applicable to this small, run-of-river project. However, if this changes in the future, the current expected capacity rate would be \$48.65/kW-yr and the capacity would be 4.7 MW.

If you have any questions about this filing, please contact the undersigned at the addresses or telephone numbers listed below.

Kimberly D. Bose
