Subject: Don Pedro Hydroelectric Project, FERC Project No. 2299-082
La Grange Hydroelectric Project, FERC Project No. 14581-02
Filing of Response to February 16, 2018 Request for Additional Information,
Resource Agency Late Filing and Other Related Information

Dear Secretary Bose:

On January 29, 2018, federal and state resource agencies and interested parties filed extensive comments in response to notices issued by FERC on November 30, 2017, that the Districts' Don Pedro Amended Final License Application (AFLA) and La Grange Final License Application (FLA) were ready for environmental analysis (REA). The Districts had 45 days to file reply comments on the well-over 1,000 pages of filings made on January 29, 2018.

On February 13, 2018, the Districts filed a request for extension of time to file reply comments. FERC denied the request by letter dated February 16, 2018, and in the same letter issued to the Districts a request for additional information to be submitted by May 14, 2018, to be accompanied by any other information that the FERC staff should consider in the draft EIS. On March 8, 2018, CDFW late-filed additional comments with FERC and the Districts reserved their right to file additional reply comments. On March 15, 2018, the Districts timely submitted Reply Comments to the relicensing participants' January 29, 2018, comments.

In accordance with FERC's February 16, 2018, request for additional information, the Districts herewith submit the requested information and additional related information for FERC staff to consider in the draft EIS for the Don Pedro and La Grange hydroelectric projects. A Table of Contents identifying the information in this submittal is provided on page 3.

Kimberly D. Bose
